Graduate Studies Office,  
Southeastern University,  
No. 1, Xueyaun Road-Nanjing,  
Jiangsu Province, 210096, China

Dear Admissions Committee,

**RECOMMENDATION LETTER FOR MR. EMMANUEL KWAME YEBOAH**

I am writing to strongly recommend Emmanuel Kwame Yeboah to Southeastern University, China in order to pursue a master's degree program in Civil Engineering at your prestigious institution. While Emmanuel Kwame Yeboah was completing coursework, research, project work and internships, I had the pleasure of serving as his mentor and supervisor.

While serving as the president of the Civil Engineering Association, a member of the University Engineering Council, the department's project director and course representative, and the vice president of the Sunyani East Municipal National Service Personnel-Bono Region, Emmanuel continuously displayed an amazing capacity to work both independently and cooperatively. His work ethic and initiative have been demonstrated in several fields such as soil analysis, computational fluid dynamics, structural engineering, geotechnical engineering, numerical analysis, and transportation engineering.

It is quite admirable how well he gets along with colleagues and makes positive contributions to the team's goals. When Emmanuel blends academics with leadership, he demonstrates a high degree of intelligence and a thorough comprehension of civil engineering topics. His academic accomplishments are a testament to his sharp analytical abilities and comprehension of difficult technical concepts. Beyond intelligence, he tackles problems with optimism, exhibiting adaptability and resilience in the face of difficult assignments.

Emmanuel has clear potential for continued academic and professional development. He has the potential to make significant contributions to the field of safety and engineering because of his creative problem-solving style and strong interest in the subject.

I am certain he will excel in your esteemed institution Southeastern University and continue to assume leadership responsibilities. Emmanuel has a full confidence that he can make significant future contributions to the field of civil engineering. In order to accomplish his vision, he wants to create more buildings and roads for his nation and use transformative leadership to improve his community. Currently employed with Relax City Real Estate in Sunyani, Ghana, he oversees and manages a number of projects around the municipality and the Bono area. He will undoubtedly affect his university, church, neighborhood, and the entire nation if he is able to implement constructive change, in my opinion.

His aim to leave a lasting impression is demonstrated by his devotion to perfection. Emmanuel's capacity to adjust to a new cultural setting in Southeastern University environment seems likely, based on my observations of his interactions with various groups of people. He will appreciate the rich cultural experiences that Southeastern University cuisine, language, dance, and religion have to offer. His kind and receptive attitude cultivates positive relationships.

Conclusively, I fully recommend Emmanuel Kwame Yeboah's application for the admission in Southeastern University. He is a perfect fit for this esteemed university scholarship opportunity because of his exceptional academic record, strong work ethic, upbeat attitude, and cultural adaptability.

If you have any further questions or require additional information, please do not hesitate to contact me.

Sincerely,

Ing. Prof. Eric Ofosu Antwi  
Director, Regional Centre for Energy and Environmental Sustainability
